

Finding “the” Job Description

Strategy to find a right job description

- 
- Eliminating factors of Job Description (education, location, experience)
 - Map ideal job to Job Description (because Ideal Job is just working at “Google” or “Microsoft” etc)
 - Visa requirement (eg Amazon doesn’t hire CPT unless from their student portal)

Eliminators

- Education: Bachelors (preferred); any graduation, High School etc
- Fully Remote: (current guidelines might change and go back to original) (must inform recruiter)
- Experience (Don't look for entry job if you have more than 5 year experience)

Map Ideal Job to JD

- Let's not see ideal job as a company but a company culture
- Benefits over salary
- Startup vs Established companies
- Technology vs Product
- Check review of company before applying for a job

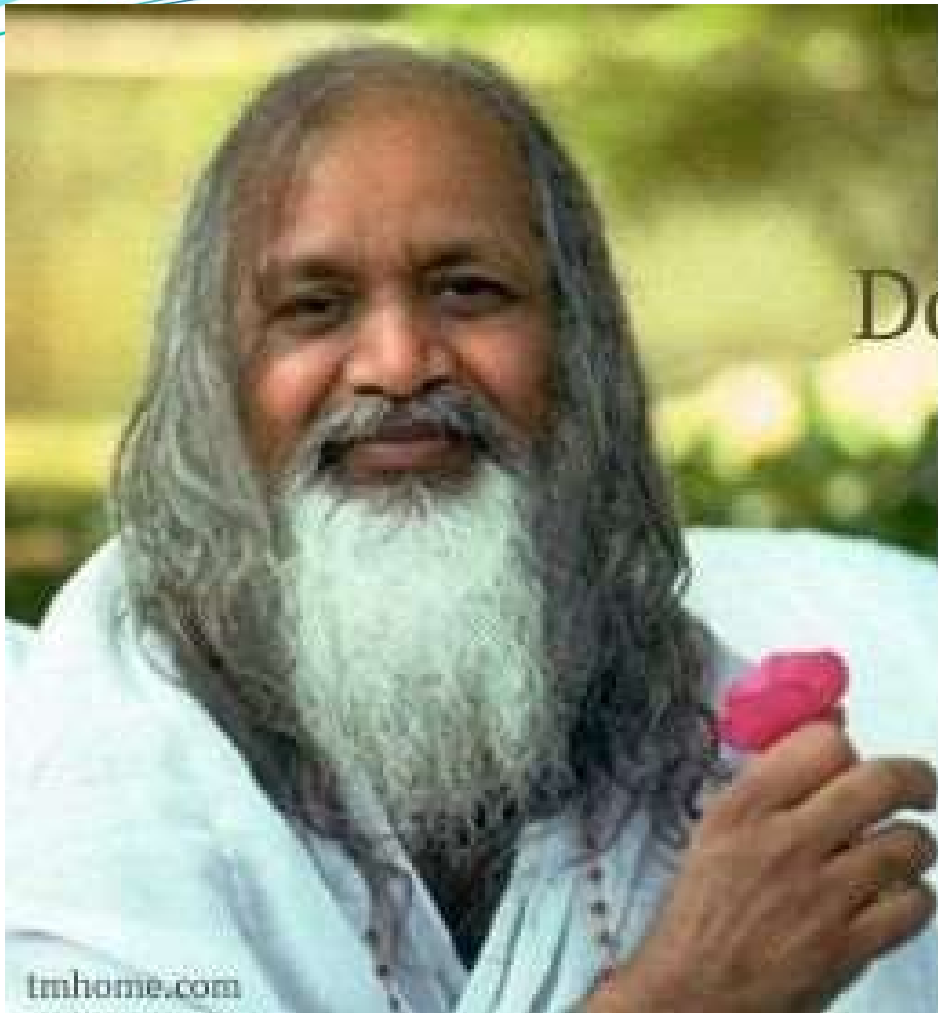

Visa Requirement

- Companies that don't hire CPT, eg, Amazon – only job through their student portal.
- Job Category that don't fit with CPT/OPT:
 - 1099 (ten 99)
 - Corp-2-Corp or C2C
 - Contractor
 - Temporary
 - Train-2-Hire
- US/Canada citizen only
- High Security clearance

Look into the Details

- Disqualified Job Description
- Qualified Job Description

Don't fight darkness -
bring the light,
and darkness
will disappear.
